

MISSION

The VSV 'Leonardo da Vinci' is the TU Delft Aerospace Engineering students' study association. Its aim is to enrich its members' lives at university by offering them:

- Support in their studies
- A social platform
- Career development

The association achieves this thanks to the drive and ambition of its student members and their professional attitude. The board of the VSV endeavours to be as open and as transparent as possible towards VSV members and always to adopt a critical approach to the way the association operates. The VSV also forges links between students and their future employers. Finally, VSV 'Leonardo da Vinci' is a well-known name in the aerospace industry in the Netherlands.

The activities of the VSV can be divided into the **three key areas** detailed below.

Education	Social	Career
Quality Control	Excursions & Inhouse Days	
	Lectures	
Book Sale	Study Tours	
Study Support	Drinks & Parties	Career Fair
	Publications	
	Personal Development	

VISION

VSV IN 2019

Context

In its activities, the VSV depends on several key players: students of Aerospace Engineering, the Faculty of Aerospace Engineering/TU Delft, and the general aerospace industry. In the wake of recent study-related measures, including the binding recommendation on continuation of studies, Aerospace Engineering students are expected to shift their focus more towards their studies during the next five years. The VSV is also anticipating a reduction in the financial support it receives from TU Delft, which will affect the compensation its members receive for the delay in their studies caused by their work for the association.

Development

In the next five years, the VSV 'Leonardo da Vinci' aims to achieve significant development in four areas:

- Internal reform
- Network internationalisation
- Study support
- Student and staff commitment

In the years ahead, the VSV will place a strong emphasis on **professionalising** the association. At the end of that period, the VSV will have a modern, integrated and **fully integrated IT solution** at its disposal, enabling it to work efficiently and effectively. The VSV will also review its **range of activities** in order to ensure that they fully reflect its members' wishes.

In addition, the association aims to have **cooperative alliances with all leading international aerospace organisations** by the end of the five-year period.

The VSV's **study support platform** will also be expanded in order to meet the specific wishes of its members. On the one hand, this will involve **extending study support**, such as shared study facilities and providing training courses. On the other hand, its contribution towards **quality control in the Master curriculum** will be further enhanced to reach the same standard as for Bachelor's courses by the end of the next five years.

This means that, within the next five year, the VSV will have changed to such an extent that **both Bachelor's and Master's students** will feel that it adds value to their student life. In order to achieve this, the association is committed to a high level of transparency. Furthermore, the VSV will then be a true reflection of the student population in the AE faculty. Finally, **faculty staff** will also recognise the added value the association provides for students and communicate this to others.

Mission and Vision

Society of Aerospace
Engineering Students

About this document

In 2014 the Multiple Year Committee (MJC) formulated a Mission and Vision for the VSV 'Leonardo da Vinci'. This committee consists of a selection of former board members and aims to improve the continuity and effectiveness of the policy of the VSV's board.

In the Mission, the identity of the society is described. Who are we? What do we do? For whom do we do this? And in what way?

In the Vision, the aspiration for the future is outlined, which is ambitious but feasible. It describes the different facets of the society five years from now and elaborates on the motivation behind these. A period of five years was chosen due to the fast changing climate within the society: every year the board members are succeeded by new ones and within seven to eight years, the entire student population is renewed.
